

Wellness and healing

Healing and wellness is important for preventing substance use disorders (SUDs) and aiding recovery. Healing can happen for individuals, families and communities.

Mindfulness

Mindfulness is “the art of being present in your own life”. Practicing mindfulness by living in the moment and listening to your breathing can support recovery from substance use. In fact, research has found that mindfulness can reduce pain and help people recognize and manage certain emotions.

Join Changemaker and trauma-informed yoga instructor, Jenna Dickinson, for a series of videos to help you focus on the present moment through breath work and

physical exercises.
